Connecticut is becoming increasingly diverse. Between 2010 and 2015, the nonwhite population increased from 28% to 31%. In Cheshire, 80% of residents are white, while 20% are nonwhite.

Household Income

Cheshire’s annual median household income in 2015 was $106,489, 51% more than Connecticut’s median household income of $70,331. It is 73% more than New Haven County’s median household income of $61,640. Cheshire’s median household income ranks 27 (1=highest, 169=lowest) among CT’s 169 municipalities.

Aging of the Population

Cheshire is one of the 116 Connecticut municipalities projected to see a drop in their school-age population between 2020 and 2030. Many municipalities will see declines over 15%. In Cheshire, the projected decrease is 16%. Meanwhile the 65+ population for Cheshire is projected to increase by 7%.

*Source: 2011-15 American Community Survey*

Cheshire saw its number of housing units increase by 9% from 2000 to 2015. Renters live in 12% of Cheshire’s housing stock, compared to 33% for New Haven County and 30% for Connecticut.

### Units in Structure

Overall, 66% of CT’s occupied housing stock is comprised of single-family housing, while 33% is multifamily housing (2+ units in structure) and 1% is mobile homes.

In Cheshire, 86% of occupied homes are single-family, 13% are multifamily (2+ units in structure), and 1% are mobile homes. Renters live in 49% of Cheshire’s 1,287 multifamily homes, and owners occupy 94% of its 8,585 single-family homes.

### Year Built

CT’s housing stock varies in age, with 22% built before 1939, 36% built from 1940 to 1969 and 42% built from 1970 on.

In Cheshire, 8% of the housing stock was built prior to 1939, 41% was built between 1940 and 1969 and the remaining 52% was built after 1970. Shifting demographics indicate that housing built from 1970 on may not meet the needs of CT’s current and future residents.

### Bedrooms

A majority of homes in CT have 3 or more bedrooms, with 37% having 3 bedrooms and 22% having 4 or more. 42% of the homes in the state have 2 or fewer bedrooms.

Over 75% of homes in Cheshire have 3 or more bedrooms, while 25% have 2 or fewer bedrooms. Towns and cities that have larger homes with more bedrooms offer fewer housing options for younger workers or downsizing Baby Boomers.

### Housing Units by Number of Bedrooms

Housing Costs for Owners and Renters

Affordability

Across CT, 50% of renters and 32% of owners spend more than 30% of their income on housing. In Cheshire, 22% of renters spend more than 30% of their income on housing, while 25% of owners do the same. Households that spend more than 30% of their income on housing may have little left over for necessities such as transportation, food, health care, etc.

Home Value

The value of homes in Connecticut has risen significantly over the last 15 years, putting home ownership out of reach for many middle-class households. In Cheshire, 16% of homes were valued under $150,000 in 2000, compared to 8% now. The median home value in Cheshire is now $337,800, an increase of 63% since 2000.

Gross Rent

According to 2011-15 American Community Survey data, 49% of Cheshire’s 1,201 rental units have a gross rent over $1,000 per month and 18% have a gross rent under $750 per month.

Housing Costs & Income

Housing Wage

2017 Housing Wage: Cheshire

$25.48

Cheshire is included in the New Haven-Meriden Metro Area.

Each year, the National Low Income Housing Coalition calculates the “housing wage,” the hourly wage needed for a household to afford a typical 2-bedroom apartment in metro areas throughout the United States.

Connecticut’s housing costs are typically high, ranking #8 in 2017 with a housing wage of $24.72.

Building Permits

Connecticut saw a sharp decline in building permits following the crash of the housing market in the mid-2000s. As the housing market slowly recovers, statewide building permits have increased by small amounts since 2011, with permits for multifamily units at levels not seen for a decade. Building permits issued, however, remain well below the levels seen in the 1980s and 1990s.

Affordable Housing Appeals List

Each year the CT Department Of Housing surveys municipalities in the state to determine the number of affordable units each has. The data is compiled for the Affordable Housing Appeals List. The following housing units are counted as affordable in Cheshire in 2016:

<table>
<thead>
<tr>

Connecticut housing prices declined precipitously after the 2008 financial crisis and have not rebounded to pre-crisis levels, particularly in municipalities - 113 of 169 - where housing stock is dominated by single-family homes. Across the state, 152 municipalities have seen either no change in real property grand lists, or declines, forcing most to raise mill rates, reduce services, or both. Cheshire’s Housing Data Profile:
The Story Behind the Numbers

Cheshire, like most of Connecticut’s municipalities, has a relatively high median household income, high housing costs, few units for teachers, nurses, electricians, firefighters and town workers, and a narrow range of housing choices for Baby Boomers seeking to downsize and Millennials and young families seeking to move to town.

Housing remains only modestly expensive in Cheshire relative to the median household income. Statewide, 50% of renters and 32% of homeowners spend 30% or more of their household incomes on housing. In Cheshire, where the $106,489 median household income is higher than the statewide median of $70,331, 22% of the town’s renters and 25% of its homeowners spend 30% or more of their income on housing.

Cheshire is one of the many Connecticut municipalities that could see a potentially significant decline in school enrollment through 2030 because of a projected decline in school-age (5-19) population of 16% from 2020 to 2030. At the same time, its population is getting older, with a projected increase of 7% in the 65+ population from 2020 to 2030, potentially leading to the need for smaller, denser, more affordable homes closer to the town center, services and, if possible, transit connections.

While the number of renting households in Connecticut has increased from 30% to 35% since 2007, many towns are ill-prepared to accommodate the needs of renters. Cheshire is one of 118 Connecticut municipalities with single-family homes dominating its housing stock (86%) and little modest or multifamily housing to offer (25% units are 0-2 bedrooms, compared to 42% statewide), mostly because many of those towns built the bulk of their homes after 1970 (52% in Cheshire) to accommodate the needs of new Baby Boomer families then in their 20s.

Now in their 60s, those families are seeking more modest homes. But their attempts to sell are being met by few offers because few young families can afford to move to those towns, flattening median sales prices and stunting the growth of Grand Lists – the towns’ total value of real property – and thus property tax revenues needed to pay for increasingly expensive services. From 2008 through 2016 (latest OPM figures), 150 towns experienced negative growth in real property values, 2 had no growth and 7 had only slight growth of 2 percent or less. The total real property Grand List in Cheshire declined by 5% from 2008 through 2016.

Across the state, 138 of the 169 municipalities have affordable homes totaling less than 10% of their housing stock. These are the kinds of homes increasingly sought by young professionals, families, town workers, downsizing Baby Boomers and others. In Cheshire, 4% of the homes are affordable, according to the state’s 2016 Affordable Housing Appeals List.
