### Household Income

Groton’s annual median household income in 2015 was $62,137, 12% less than Connecticut’s median household income of $70,331. It is 6% less than New London County’s median household income of $66,233. Groton’s median household income ranks 143 (1=highest, 169=lowest) among CT’s 169 municipalities.

### Aging of the Population

Groton is one of the 48 Connecticut municipalities projected to see a rise in their school-age population between 2020 and 2030. Many municipalities will see declines over 15%. In Groton, the projected increase is 1%. Meanwhile the 65+ population for Groton is projected to increase by 11%.

Source: 2011-15 American Community Survey

Groton saw its number of housing units increase by 10% from 2000 to 2015. Renters live in 45% of Groton’s housing stock, compared to 29% for New London County and 30% for Connecticut.

Units in Structure

Overall, 66% of CT’s occupied housing stock is comprised of single-family housing, while 33% is multifamily housing (2+ units in structure) and 1% is mobile homes.

In Groton, 56% of occupied homes are single-family, 41% are multifamily (2+ units in structure), and 3% are mobile homes. Renters live in 88% of Groton’s 6,728 multifamily homes, and owners occupy 74% of its 9,123 single-family homes.

Year Built

CT’s housing stock varies in age, with 22% built before 1939, 36% built from 1940 to 1969 and 42% built from 1970 on.

In Groton, 16% of the housing stock was built prior to 1939, 29% was built between 1940 and 1969 and the remaining 55% was built after 1970. Shifting demographics indicate that housing built after 1970 on may not meet the needs of CT’s current and future residents.

Bedrooms

A majority of homes in CT have 3 or more bedrooms, with 37% having 3 bedrooms and 22% having 4 or more. 42% of the homes in the state have 2 or fewer bedrooms.

Over 49% of homes in Groton have 3 or more bedrooms, while 51% have 2 or fewer bedrooms. Towns and cities that have larger homes with more bedrooms offer fewer housing options for younger workers or downsizing Baby Boomers.

**Affordability**

Across CT, 50% of renters and 32% of owners spend more than 30% of their income on housing. In Groton, 43% of renters spend more than 30% of their income on housing, while 31% of owners do the same. Households that spend more than 30% of their income on housing may have little left over for necessities such as transportation, food, health care, etc.

**Home Value**

The value of homes in Connecticut has risen significantly over the last 15 years, putting home ownership out of reach for many middle-class households. In Groton, 58% of homes were valued under $150,000 in 2000, compared to 18% now. The median home value in Groton is now $253,300, an increase of 89% since 2000.

**Gross Rent**

According to 2011-15 American Community Survey data, 60% of Groton’s 8,413 rental units have a gross rent over $1,000 per month and 17% have a gross rent under $750 per month.

In Connecticut, incomes among those who own their homes tend to be much higher than incomes for renter households. However, incomes for owners who no longer pay a mortgage also tend to be lower than for those paying a mortgage, as those no longer paying a mortgage may be retired and living on fixed incomes.

**Housing Costs & Income**

**Owner Households: Groton**

The average homeowner household in Groton has a median income of $85,887

</table>

**Renter Households: Groton**

Median Income Renter Households = $50,518

19% less than the median income of all households.

27% of income spent on rent.

Median Gross Rent = $1,149

73% of income for all other expenses.
Housing Wage

2017 Housing Wage: Groton

$20.71

Groton is included in the Norwich-New London Metro Area.

Each year, the National Low Income Housing Coalition calculates the “housing wage,” the hourly wage needed for a household to afford a typical 2-bedroom apartment in metro areas throughout the United States.

Connecticut’s housing costs are typically high, ranking #8 in 2017 with a housing wage of $24.72.

Building Permits

Connecticut saw a sharp decline in building permits following the crash of the housing market in the mid-2000s. As the housing market slowly recovers, statewide building permits have increased by small amounts since 2011, with permits for multifamily units at levels not seen for a decade. Building permits issued, however, remain well below the levels seen in the 1980s and 1990s.

Grand List

</tbody>
</table>

% Change, 2008-16: -11%

Connecticut housing prices declined precipitously after the 2008 financial crisis and have not rebounded to pre-crisis levels, particularly in municipalities - 113 of 169 - where housing stock is dominated by single-family homes. Across the state, 152 municipalities have seen either no change in real property grand lists, or declines, forcing most to raise mill rates, reduce services, or both.

Groton, like most of Connecticut’s cities and first-ring suburbs, has a low-to-moderate median household income, relatively low housing costs, a substantial if aging supply of units for teachers, nurses, electricians, firefighters and town workers, but a still too narrow range of housing choices for Baby Boomers seeking to downsize and Millennials and young families seeking to move to town.

Housing remains expensive in Groton relative to the median household income. Statewide, 50% of renters and 32% of homeowners spend 30% or more of their household incomes on housing. In Groton, where the $62,137 median household income is lower than the statewide median of $70,331, 43% of the town’s renters and 31% of its homeowners spend 30% or more of their income on housing.

Groton is one of the few Connecticut municipalities that could see an increase in school enrollment through 2030 because of unusual, if modest, anticipated growth in school-age (5-19) population of 1% from 2020 to 2030. At the same time, its population is getting much older, with a projected increase of 11% in the 65+ population from 2020 to 2030, potentially leading to the need for smaller, denser, more affordable homes closer to the town center, services and, if possible, transit connections.

Groton is among the third of Connecticut municipalities where single-family homes do not dominate its housing stock (56%) and there is substantial multifamily housing to offer (51% of the units are 0-2 bedrooms, compared to 42% statewide). Many towns in Connecticut built the bulk of their homes after 1970 to accommodate the needs of new Baby Boomer families then in their 20s. In Groton, 55% of homes were built in 1970 or after.

Now in their 60s, those families are seeking more modest homes. But their attempts to sell are being met by few offers because few young families can afford to move to those towns, flattening median sales prices and stunting the growth of Grand Lists – the towns’ total value of real property – and thus property tax revenues needed to pay for increasingly expensive services. From 2008 through 2016 (latest OPM figures), 150 towns experienced negative growth in real property values, 2 had no growth and 7 had only slight growth of 2 percent or less. The total real property Grand List in Groton declined significantly by 11% from 2008 through 2016.

Across the state, 138 of the 169 municipalities have affordable homes totaling less than 10% of their housing stock. These are the kinds of homes increasingly sought by young professionals, families, town workers, downsizing Baby Boomers and others. In Groton, 22% of the homes are affordable, according to the state’s 2016 Affordable Housing Appeals List.
